

To Whom It May Concern

MCD Plumbing has been the main plumbing contractor at Warriapendi Primary School via the BMW faults service with the Department of Education for the last four years while I have been Principal of the school.

MCD Plumbing have provided excellent plumbing expertise, high knowledge of their products, friendly, professional and flexible service with our school; working around before and after school timeframes so little disruption to the staff and students at Warriapendi Primary School.

MCD Plumbing have completed all jobs allocated to their business via BMW within the timeframes and we have no issues at all with the service provided.

Sean and his team are very familiar with our school and have been able to provide us solutions to any school plumbing issues. We have found Sean to be creative in problem solving and highly professional when interacting with staff, students and site visitors. He and his team has enabled our school to continue accessing high quality, functional plumbing that, when issues arise, is quickly repaired/replaced.

I strongly recommend the team at MCD Plumbing for any potential future contracts.

Kind Regards

Matt Pinkard
Principal
